

Patient Testimonial

“The lightness of the gift of perfect eyes has improved my whole spirit and attitude.”

It’s hard to convey what a positive, life-changing experience this has been. Because of my vision, I’ve been hampered in most activities, to some degree or another, since I was 7 years old. Now this gift of total freedom is really unbelievable. Every day I wake up and can see the pine needles and tiny birds in the trees. I can use binoculars to spot wildlife. I can swim. I can ride my motorcycle in comfort. It’s really crazy how extensive the list is!

I can only imagine it’s somewhat analogous to having a cast on a broken leg, and how wonderful it feels when it’s removed and your leg works like it’s supposed to. Except in my case, I’m multiplying that feeling by 47 years instead of just a six-week impediment! I’d never realized how many ways I’d compensated for blurred vision and endured the discomfort of contacts and glasses. The lightness of the gift of perfect eyes has improved my whole spirit and attitude.

My professional life as an attorney is also enhanced by the results of my LASIK surgery. Lawyers spend too much time reading and using a computer. Having a headache from eye strain, being hampered by trying to accommodate one or two different prescriptions (astigmatism and the recent addition of farsightedness to my long-existing nearsightedness), and juggling glasses and/or monovision contacts was more than a nuisance—it was a serious distraction from my case work.

As a consumer, the “custom” aspect of LASIK refractive surgery with Intralase™ was really a selling point for me. I learned that this was the most up-to-date, most fine-tuned procedure available, and it was totally individualized for my eyes.

Anyone considering eye surgery seeks a lot of reassurance, and the materials I received from Jodi were very thorough and simple to understand. I was also impressed by Dr. Nedrud’s credentials. The comprehensive materials and easy-to-navigate website, along with the convenience and accessibility of a local provider, influenced my decision to go with Rocky Mountain LASIK rather than an out-of-state facility. The entire team was very personable, knowledgeable, and patient.

Another major concern for those considering LASIK is cost. Rocky Mountain LASIK’s price list is very simple, with no hidden costs—one price for the entire pre-op, surgery, and post-op care.

For personal and professional reasons, this surgery has been a life-changing event for me, and can be for anyone who’s a LASIK candidate.
